

Lab Task-1:

1. Find the average value of the elements of an array. (no need to take the array as input)
2. Take two strings as your first and last name as input, then concatenate the two strings together so that you can find your full name:  
e.g. First name = "Shakila" and Lastname = "Rahman"  
output: full name = "Shakila Rahman"
3. First take the number of students, take their name and marks as input and write them in a file, then read it.
